Vishesh Jha

visheshjha456@gmail.com | 7696750043 | linkedin.com/in/visheshjha11 | github.com/Visheshjha11

PROFESSIONAL SUMMARY

Computer Science student with strong foundation in Linux, Machine Learning, and Distributed Systems and strong fundamentals in Data Structures & Algorithms (300+ problems solved across LeetCode, GFG, and other platforms). Strong problem-solving abilities with a focus on clean, reliable, and maintainable code. Eager to apply core computer science fundamentals to challenging software engineering problems and grow as a systems-oriented engineer.

EDUCATION

Chitkara University, Punjab ***2024 – 2028***

B.E., Computer Science & Engineering ***- CGPA: 8.72/10***

PROJECTS

ARGUS AI — Near-Earth Object Intelligence Platform | *github.com/Visheshjha11/Argus* **Aug 2026**

- Built an AI-powered asteroid risk assessment platform using historical NEO data and NASA APIs to analyze orbital and physical characteristics of Near-earth objects.
- Developed a Random Forest classification model using features including estimated diameter, relative velocity, miss distance, absolute magnitude and NASA hazardous-object classification to predict asteroid threat levels.

Saarthi — AI-Powered Academic Ecosystem | *Next.js, TypeScript, Node.js, Express.js, Pinecone* ***May 2026***

- Built a full-stack AI academic ecosystem combining Retrieval-Augmented Generation (RAG), semantic search, and Pinecone vector embeddings to enable natural-language querying and intelligent assistants that streamline learning workflows.
- Implemented AI chat, document intelligence, attendance insights, and personalized academic assistance within a unified platform.
- Built a full competitive-programming style interface to solve any coding problem, with test cases auto-generated using the equivalence-partitioning method.

VelocityDev — Developer typing Platform | *Next.js, TypeScript, Socket.io* ***Dec 2025***

- Engineered a developer-focused typing platform designed to improve coding speed and accuracy through programming-oriented typing challenges, real-time performance metrics, and personalized practice.
- Implemented a real-time global leaderboard using Socket.io, dynamically ranking users based on typing performance and synchronizing score update across connected clients.

PrepX — Online Examination & Preparation Platform | *React, Node.js, Express.js, MongoDB* ***Aug 2025***

- Built a full-stack online examination platform supporting exam creation, question management, submissions, and automated evaluation through REST APIs.
- Implemented role-based access control for students and educators, securing platform features and user-specific workflows.

Experience

Technical & Outreach Lead | *Institution of Engineers (India) – IEI Student Chapter* ***2025 – Present***

- Led technical and digital outreach for the IEI, coordinating 3 workshops and events that reached 100+ students.

Open-Source Contributor ***2024 – Present***

- Authored and revised technical documentation across 5 open-source repositories spanning web development tooling and AI/ML frameworks, submitting 10+ pull requests that clarified setup guides, API references, and usage instructions for downstream contributors.
- Worked directly with project maintainers through issue discussions and code reviews to validate technical accuracy of documentation against evolving codebases and contribution standards.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, TypeScript
Cloud & DevOps: Docker, CI/CD (GitHub Actions), AWS, Azure
Frameworks & APIs: React.js, Next.js, Express.js, Node.js, REST APIs.
Databases: MongoDB, MySQL, PostgreSQL, Pinecone.
Systems & Tools: Linux/Unix, Git, GitHub, Postman
Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems.

ACHIEVEMENTS

Hackathons:

- **Hackathons Participant** – Participated in 12+ hackathons, securing Top 10 finishes in 7+ competitions.
- **AVINYA 3.0 Hackathon** – Secured 2nd Runner-Up.
- **Smart India Hackathon 2025** – Won the college round, ranking among the top teams out of 300+ participants.
- **Build with AI (Google)** – Qualified among the TOP 30 teams out of 700+ teams.
- **Hacktoberfest 2025** – Completed 6 accepted open-source contributions across participating repositories.
