Skills

Languages: Java, Python, C/C++, JavaScript, TypeScript, SQL

Systems and Backend: React.js, Next.js, Node.js, Express.js, REST APIs, MongoDB.

DevOps and Tools: Git, GitHub, Docker, Postman, Linux, Vercel, MySQL, Pinecone.

Projects

Saarthi - AI-Powered Academic Ecosystem | *Next.js, React, TypeScript, Node.js, Express.js, Pinecone* **May 2026**

- Built a full-stack AI academic ecosystem that combines Retrieval-Augmented Generation (RAG), semantic search, and intelligent assistants to streamline learning workflows.
- Built an end-to-end AI pipeline using vector embeddings, Pinecone, and large language models to deliver context-aware responses from uploaded academic documents.
- Implemented AI chat, document intelligence, attendance insights, resource management, and personalized academic assistance within a unified platform.

PrepX - Online Examination & Preparation Platform | *React • Node.js • Express.js • MongoDB* **Nov 2025**

- Built a full-stack assessment platform supporting quiz creation, submissions, and evaluation via REST API
- Implemented role-based access control for secure user management
- Designed relational database schemas for scalable and efficient data handling

PULSE | Wearable Emergency Alert Device | *ESP32, SIM800L (GSM), IoT* **Jul 2025**

- Designed an IoT-based wearable safety device capable of detecting abnormal pulse and motion events.
- Integrated ESP32 with GSM module (SIM800L) for real-time emergency alerts
- Ensured reliable sensor-to-alert communication under constrained conditions

Veronica | Personal AI Assistant | *Python, Automation Scripts, Google Cloud Console* **Jan 2025**

- Developed a Python-based personal AI assistant integrating speech recognition, automation scripts, and cloud APIs for task execution.
- Implemented command execution pipelines for reminders and information retrieval
- Enabled device interaction through scripts and API integrations

Work Experience

Institution of Engineers (India) - IEI Student Chapter **Nov 2025 – Present**

- Led technical content and digital outreach for the student chapter, coordinating event promotions, workshops, and community initiatives to increase participation and strengthen the chapter's online presence.

Open-Source Contributor **Aug 2024 – Present**

- Contributed bug fixes, documentation improvements, and feature enhancements across open-source GitHub repositories.
- Collaborated with maintainers through pull requests, issue discussions, and code reviews using Git workflows.

Education

Chitkara University **Aug 2024 – 2028**

B.E. in Computer Science and Engineering

Punjab, India

Achievements

- Second Runner-Up – AVANIYA 4.0 Hackathon (Saarthi – AI-Powered Academic Ecosystem).
- Solved 250+ Data Structures & Algorithms problems across coding platforms.
